“ *The more I reflect, the more I realize what an impact John had on my father and his life.....from the D&C ships to the physical plants of Packard, Curtis Wright and Ford Motor Company, he was with my father every step of the way. My father valued his friendship, and they shared so many good times together. I am grateful in my life for John being such a wonderful mentor to my father, for he gave him the confidence and encouragement to strive for his goals. My thoughts and prayers are with you, and may your wonderful memories sustain you through this time and season. Margaret Adams*

“ *John hired me at OCC in 1980 to work in the boiler plant. As I studied for higher boiler operator licenses I would tap into John's vast wealth of knowledge on the subject. From his stories of steaming on the great lakes to working at Strohs, I am convinced he knew all there was to know about the trade. He helped me tremendously and for that I will always be grateful. He was always in control at work and would create a sense of calm even when things got out of control, a trait that is hard to copy. He was the best boss I ever had and he will truly be missed.*
